The Management of Chemical and Biological Information

Edited by Frank Brown, Ed Maliski & Peter Gund

268 **Frank Brown, Peter Gund & Ed Maliski**
Editorial overview

269 **Brian J Stockman**
Flow NMR spectroscopy in drug discovery

275 **James Devillers**
New trends in (Q)SAR modeling with topological indices

280 **Bill Ladd & Shawn Kenner**
Information visualization and analytical data mining in pharmaceutical R&D

292 **Mark TD Cronin**
Computational methods for the prediction of drug toxicity

298 **Antony Williams**
Recent advances in NMR prediction and automated structure elucidation software

306 **Julian Hayward & Ian Buchan**
Benefits of Data Cartridge technology for handling chemical information

310 **Alexander Tropsha**
Recent trends in computer-aided drug discovery

314 **Vladimir K Piotrovsky**
Population pharmacodynamic and pharmacokinetic modeling via mixed effects

The cover

Knowledge discovery workflow illustration created by Spotfire Inc, Cambridge, MA, USA (featured in the review by Bill Ladd and Shawn Kenner - in this issue). Designed by Casey Thibeault.
