The Chemistry of Metabolic and Toxicological Processes

Edited by Dale E Johnson, Dennis A Smith & B Kevin Park

27 Dale E Johnson, Dennis A Smith & B Kevin Park
Editorial overview

29 Linda A Kowalski
In vitro carcinogenicity testing: Present and future perspectives in pharmaceutical development

36 R Scott Obach
The prediction of human clearance from hepatic microsomal metabolism data

45 Robert J Riley
The potential pharmacological and toxicological impact of P450 screening

55 Jack Uetrecht
Prediction of a new drug's potential to cause idiosyncratic reactions

60 E Vicky Warbrick, Rebecca J Dearman & Ian Kimber
Prediction of drug allergenicity: Possible use of the local lymph node assay

66 Stephen Madden & Peter H Bach
Integrating metabolism and toxicity in multi-organ systems

73 Patrick J Crowley & Luigi G Martini
Enhancing oral absorption in animals

81 Walter H Bee
Standardized electroretinography in primates: A non-invasive preclinical tool for predicting ocular side effects in humans

92 Dale E Johnson, Paul E Blower Jr, Glenn J Myatt & Grushenka HI Wolfgang
Chem-tox informatics: Data mining using a medicinal chemistry building block approach

102 Brent L Podlogar, Ingo Muegge & L Jonathan Brice
Computational methods to estimate drug development parameters

110 Stephen K Durham & Greg M Pearl
Computational methods to predict drug safety liabilities

116 Brian B Haab
Advances in protein microarray technology for protein expression and interaction profiling

124 Larry C Mattheakis & Alex Savchenko
Assay technologies for screening ion channel targets
