The Chemistry of Metabolic and Toxicological Processes

Edited by Dale E Johnson, Dennis A Smith & B Kevin Park

31 Dale E Johnson, Dennis A Smith & B Kevin Park
Editorial overview

33 Han van de Waterbeemd
High-throughput and *in silico* techniques in drug metabolism and pharmacokinetics

44 William Bains, Richard Gilbert, Lilya Sviridenko, Jose-Miguel Gascon, Robert Scoffin, Kris Birchall, Inman Harvey & John Caldwell
Evolutionary computational methods to predict oral bioavailability QSPRs

52 Desmond O'Connor
Automated sample preparation and LC-MS for high-throughput ADME quantification

59 Beate Bittner & Richard J Mountfield
Intravenous administration of poorly soluble new drug entities in early drug discovery: The potential impact of formulation on pharmacokinetic parameters

72 Vincent Meador, William Jordan & John Zimmermann
Increasing throughput in lead optimization *in vivo* toxicity screens

79 Peter J Bugelski
Gene expression profiling for pharmaceutical toxicology screening

90 Thorsten Storck, Marie-Charlotte von Brevern, Christian K Behrens, Julia Scheel & Alfred Bach
Transcriptomics in predictive toxicology

98 L Mike Furness
Analysis of gene and protein expression for drug mode of toxicity

104 Dominic P Williams & Dean J Naisbitt
Toxicophores: Groups and metabolic routes associated with increased safety risk

116 Rob Webster, Derek Leishman & Don Walker
Towards a drug concentration effect relationship for QT prolongation and torsades de pointes

127 Adam L Muzikant & R Christian Penland
Models for profiling the potential QT prolongation risk of drugs

136 Ann M Richard, ClarLynda R Williams & Neal F Cariello
Improving structure-linked access to publicly available chemical toxicity information

144 Marion L Williams & Irving W Wainer
Genotype/phenotype comparisons: A probe for the effect of disease progression on drug metabolism

150 Ryan E Watkins, Schroeder M Noble & Matthew R Redinbo
Structural insights into the promiscuity and function of the human pregnane X receptor

The cover

Cut-away view of the ligand binding cavity of human pregnane X receptor (featured in the review by Ryan E Watkins, Schroeder M Noble & Matthew R Redinbo).
