**Clinical applications of gene therapy**

Edited by **Barrie Carter & Donald B Kohn**

---

**420 Barrie Carter & Donald B Kohn**  
Editorial overview

**422 E Morrey Atkinson & Janet Rose Christensen**  
Process and product development in the  
manufacturing of molecular therapeutics

**430 Victoria S Statham & Richard A Morgan**  
Gene therapy clinical trials for HIV

**437 Donald B Kohn**  
Gene therapy using hematopoietic stem cells

**443 Emmanuel T Akporiaye & Evan Hersh**  
Clinical aspects of intratumoral gene therapy

**454 B Rajendra Krishnan**  
Interleukin 1 receptor antagonist gene therapy for  
arthritis

**458 Murray S Webb & Gerald Zon**  
Preclinical and clinical experience of antisense  
therapy for solid tumors

**464 Nils Welsh**  
Gene therapy in diabetes mellitus: Promises and  
pitfalls

**471 Clara Hwang & Martin G Sanda**  
Prospects and limitations of recombinant  
poxviruses for prostate cancer immunotherapy

**480 Ion Niculescu-Duvaz, Robert G Cooper,  
Stephen M Stribbling, James A Heyes,  
Jaqueline A Metcalfe & Caroline J Springer**  
Recent developments in gene directed enzyme  
prodrug therapy (GDEPT) for cancer

**487 Paola Leone, Christopher G Janson, Scott J  
McPhee & Matthew J During**  
Global CNS gene transfer for a childhood  
neurogenetic enzyme deficiency: Canavan  
disease

**493 Carmel M Lynch**  
Gene therapy for hemophilia

**500 JoAnn Horowitz**  
Adenovirus-mediated p53 gene therapy: Overview  
of preclinical studies and potential clinical  
applications

**510 Terence R Flotte**  
Gene therapy for cystic fibrosis

**517 Debabrata Banerjee**  
Technology evaluation: Gene therapy  
mesothelioma, (NCI)

**521 Richard Zheng**  
Technology evaluation: GEM-92, Hybridon Inc

**524 Scott J Tebbutt**  
Technology evaluation: AAV-CFTR, Targeted  
Genetics
