Molecular vaccines for disease prevention and therapy	
Edited by Campbell Bunce, Kim Lyerly & Michael A Morse	
<hr/>	
18	Campbell Bunce & Michael A Morse Editorial overview
20	Michael A Morse & H Kim Lyerly Clinical applications of dendritic cell vaccines
29	Vasso Apostolopoulos, Minmin Yu, Ian FC McKenzie & Ian A Wilson Structural implications for the design of molecular vaccines
37	Nadeem A Sheikh, Mariam Al-Shamisi & W John W Morrow Delivery systems for molecular vaccination
55	Mei-Shiang Jang, Andrei Zlobin, W Martin Kast & Lucio Miele Notch signaling as a target in multimodality cancer therapy
66	Gopi Shankar & Michael L Salgaller Immune monitoring of cancer patients undergoing experimental immunotherapy
74	Charalambos D Partidos Peptide mimotopes as candidate vaccines
80	Anthony R Fooks Development of oral vaccines for human use
87	Andrew GC Barnes, Christina Barnfield, Robert Brew & Linda S Klavinskis Recent developments in mucosal delivery of pDNA vaccines
94	Jelle ER Thole, Philip J van Dalen, Carin EG Havenith, Peter H Pouwels, Jos FML Seegers, Frans D Tielen, Michèle D van der Zee, Netty D Zegers & Michael Shaw Live bacterial delivery systems for development of mucosal vaccines
100	Sengen Sun Technology evaluation: SELEX, Gilead Sciences Inc
106	Christian Doehn & Dieter Jocham Technology evaluation: TG-1301, Transgene SA Inc
