Non-viral methods for gene transfer	
Edited by Stephen Chang & Leonard Seymour	
<hr/>	
129	Stephen Chang & Leonard Seymour Editorial overview - Gene therapy scrutiny: The duality of delivery
131	Beth Hutchins Characterization of plasmids and formulations for non-viral gene therapy
136	Charles Peter Lollo, Mariusz G Banaszczyk & Henry C Chiou Obstacles and advances in non-viral gene delivery
143	James E Hagstrom Self-assembling complexes for <i>in vivo</i> gene delivery
150	Louis C Smith & Jeffrey L Nordstrom Advances in plasmid gene delivery and expression in skeletal muscle
155	David V Schaffer & Douglas A Lauffenburger Targeted synthetic gene delivery vectors
162	John J Schwartz & Shuguang Zhang Peptide-mediated cellular delivery
168	Kathleen F Pirollo, Liang Xu & Esther H Chang Non-viral gene delivery for p53
176	Duane A Mitchell & Smita K Nair RNA transfected dendritic cells as cancer vaccines
182	Christopher M Ward Folate-targeted non-viral DNA vectors for cancer gene therapy
188	Catherine J Pachuk, Daniel E McCallus, David B Weiner & C Satishchandran DNA vaccines - challenges in delivery
199	Scott J Tebbutt Technology evaluation: Transgenic α -1-antitrypsin (AAT), PPL Therapeutics
205	Rosanne M Orr Technology evaluation: Electroporation therapy, Genetronics Inc
211	Jack Goldberg Technology evaluation: Thrombopoietin, Genentech/Pharmacia & Upjohn
216	Vijaykumar M Baragi Technology evaluation: MFG-IRAP, University of Pittsburgh
