**Daniel Jones**
- Non-viral methods for gene transfer**  
Edited by Stephen Chang & Leonard Seymour
- 
- 115 **Leonard Seymour & Stephen Chang**  
Editorial overview: Non-viral methods for gene transfer
- 116 **Thierry Bettinger & Martin L Read**  
Recent developments in RNA-based strategies for cancer gene therapy
- 125 **Gyula Hadlaczký**  
Satellite DNA-based artificial chromosomes for use in gene therapy
- 133 **Hans-Joachim Lipps & Jürgen Bode**  
Exploiting chromosomal and viral strategies: The design of safe and efficient non-viral gene transfer systems
- 142 **Kai Y Kwok, Yongsheng Yang & Kevin G Rice**  
Evolution of cross-linked non-viral gene delivery systems
- 147 **Eric L Snyder & Steven F Dowdy**  
Protein/peptide transduction domains: Potential to deliver large DNA molecules into cells
- 153 **David B Fenske, Ian MacLachlan & Pieter R Cullis**  
Long-circulating vectors for the systemic delivery of genes
- 159 **Paolo Monaci, Lorena Urbanelli & Laura Fontana**  
Phage as gene delivery vectors
- 170 **K Helen Bremner, Leonard W Seymour & Colin W Pouton**  
Harnessing nuclear localization pathways for transgene delivery
- 178 **Gregory F Lemkine & Barbara A Demeneix**  
Polyethylenimines for *in vivo* gene delivery
- 183 **Suzie J Hwang & Mark E Davis**  
Cationic polymers for gene delivery: Designs for overcoming barriers to systemic administration
- 192 **Dexi Liu & Joseph E Knapp**  
Hydrodynamics-based gene delivery
- 198 **Suzanne Smith**  
Technology evaluation: C242-DM1, ImmunoGen Inc
- 204 **Christian Doehn & Dieter Jocham**  
Technology evaluation: CV-787, Calydon Inc

## **The next issue of this journal**

---

### **Oligonucleotides - from design to clinic**

Edited by John Goodchild & Pat Iversen

Will contain:

#### **Shuntaro Kagiya, Tomoko Kagiya & M Ian Phillips**

Antisense oligonucleotide strategy in treatment of hypertension

#### **Nicholas Kipshidze, Jeffrey W Moses, Latha Raja Shankar & Martin B Leon**

Perspectives of antisense therapy for prevention of restenosis

#### **Ryzard Kole**

Oligonucleotides for the control of splicing

#### **Eric B Kmiec**

Targeted gene repair using chimeric oligonucleotides

#### **Patrick Iversen**

Morpholino antisense oligonucleotides

#### **Jesper Wengel & Henrik Oerum**

Locked nucleic acids: A promising molecular family for gene-function analysis and antisense drug development

#### **Stanley T Crooke**

Establishing the mechanism by which antisense oligonucleotides act

#### **Georg Sczakiel**

Role of target RNA structure and kinetics of hybridization in antisense inhibition

#### **Rhonda Brand**

Dermal and transdermal delivery of antisense oligomers

#### **Ronald Jubin**

Antisense inhibition of RNA editing

#### **Stephen Ekker**

Zebrafish embryogenesis antisense models for functional genomics

#### **Stephen Bartelmez**

Antisense oligomers to promote stem-cell self-renewal

#### **Vikram Arora & Pat Iversen**

Redirecting drug metabolism with antisense oligomers
