Oligonucleotides - from design to the clinic

Edited by John Goodchild & Pat Iversen

223 John Goodchild & Pat Iversen
Editorial overview: Oligonucleotides - from design to the clinic

224 Aidus Nasevicius & Stephen C Ekker
The zebrafish as a novel system for functional genomics and therapeutic development applications

229 Ryszard Kole & Peter Sazani
Antisense effects in the cell nucleus: Modification of splicing

235 Patrick L Iversen
Phosphorodiamidate morpholino oligomers: Favorable properties for sequence-specific gene inactivation

239 Henrik Ørum & Jesper Wengel
Locked nucleic acids: A promising molecular family for gene-function analysis and antisense drug development

244 Rhonda M Brand
Topical and transdermal delivery of antisense oligonucleotides

249 Vikram Arora & Patrick L Iversen
Redirection of drug metabolism using antisense technology

258 Shuntaro Kagiyama, Tomoko Kagiyama & M Ian Phillips
Antisense oligonucleotides strategy in the treatment of hypertension

265 Nicholas Kipshidze, Jeffrey Moses, Latha Raja Shankar & Martin Leon
Perspectives on antisense therapy for the prevention of restenosis

278 Ronald Jubin
Hepatitis C IRES: Translating translation into a therapeutic target

288 Rosanne M Orr
Technology evaluation: Formivirsen, Isis Pharmaceuticals Inc/CIBA Vision

295 Suzanne Smith
Technology evaluation: SGN-15, Seattle Genetics Inc

The next issue of this journal

Clinical applications of gene therapy

Edited by Barrie Carter & Donald B Kohn

Will contain:

Seng Cheng & Nelson Yew

Gene delivery for lysosomal storage diseases

Haim Burstein

Gene therapy for inflammatory joint diseases

Jeff Chamberlain

Gene therapy in muscular-skeletal/neuromuscular disorders

Phillip Johnson

Gene delivery for vaccines for infectious disease

Nathalie Cartier

Gene therapy for adrenoleukodystrophy

Tal Kafri

The applications of improved lentiviral gene vectors

Clifford J Steer

Clinical applications of gene correction

Kathryn Wood

Gene therapy and its applications in transplantation

Hansell Steadman

Gene therapy for muscular disorders

Uta Griesenbach & Eric Alton

Current progress and clinical applications of gene therapy for cystic fibrosis
