

425 Paper alert

Martin Read, Susmita Hunt, Barbara Demeneix & Gregory Lemkine

430 Patent alert

Debabrata Banerjee & Scott J Tebbutt

435 Web alert

John McGinty & Daniel Jones

503 Matthias Gromeier & Eckard Wimmer

Viruses for the treatment of malignant glioma

509 Susmita Hunt

Technology evaluation: Anticancer gene therapy (MediGene)

Viral methods for gene transfer

Edited by Mary Dinauer and Walter Günzburg

437 Walter H Günzburg

Editorial overview: The importance of being RCR

439 Erin Weber, W French Anderson & Noriyuki Kasahara

Recent advances in retrovirus vector-mediated gene therapy: Teaching an old vector new tricks

454 Stefan Kochanek, Gudrun Schiedner & Christoph Volpers

High-capacity 'gutless' adenoviral vectors

464 Luisa Peironi & Nicola La Monica

Towards the use of baculovirus as a gene therapy vector

468 Lung-Ji Chang & Jin He

Retroviral vectors for gene therapy of AIDS and cancer

476 Enca Martin-Rendon, Mimoun Azzouz & Nicholas D Mazarakis

Lentiviral vectors for the treatment of neurodegenerative diseases

482 Kathleen A Maguire-Zeiss, William J Bowers & Howard J Federoff

HSV vector-mediated gene delivery to the central nervous system

491 Arun Srivastava

Parvovirus vectors for human gene therapy

497 Terence R Flotte

Recombinant adeno-associated virus vectors for cystic fibrosis gene therapy
