

The next issue of this journal (Vol 4 No 6 December 2002)

Genomics, proteomics and pharmacogenetics

Edited by Lukas A Huber & Jennifer E Van Eyk

Will contain:

Sandy Thomas & Martin Bobrow

Gene patenting

Scott Patterson & Terry Ryan

Mass spectrometry for marker and target based discovery in proteomics

Lee M Nadler & Joachim L Schultze

From genomics to cancer vaccines: Patient tailored or universal vaccines?

Richard Labaudinière

The increasing importance of genetic variation in drug discovery and development

Kewal Jain

Personalized medicine

Julio Licinio

Pharmacogenomics/pharmacogenetics of depression and of antidepressant treatments

Howard Jacob & James Watters

Pharmacogenetics of cancer chemotherapy

Emanuel Petricoin

Proteomics and diagnostic development

Arun Sreekumar & Arul M Chinnaiyan

Cancer profiling using protein chips

A Donny Strosberg

Target validation through protein interaction mapping

Jeremy Nicholson

Metabolomics
