Oligonucleotide, antibody and peptide therapeutics - from design to the clinic

Edited by John Goodchild & Patrick L Iversen

119 **John Goodchild**

Editorial overview: Oligonucleotide, antibody and peptide therapeutics - from design to the clinic

120 **John Goodchild**

Oligonucleotide therapeutics: 25 Years ago

129 **Michaela Scherr & Matthias Eder**

RNAi in functional genomics

136 **Alessio Nencioni, Peter Sandy, Christopher Dillon, Stephan Kissler, Peter Blume-Jensen & Luk Van Parijs**
RNA interference for the identification of disease-associated genes

141 **Ben Berkhout**

RNA interference as an antiviral approach: Targeting HIV-1

146 **Santiago Dueñas-Carrera**

DNA vaccination against hepatitis C

151 **Alice Tiong & Saul Benedict Freedman**

Gene therapy for cardiovascular disease: The potential of VEGF

160 **Minzhen Xu, Xueqing Lu, Nikoletta L Kallinteris, Yu Wang, Shuzhen Wu, Eric von Hofe, Joseph V Gulfo, Robert E Humphreys & Gilda G Hillman**

Immunotherapy of cancer by antisense inhibition of li protein, an immunoregulator of antigen selection by MHC class II molecules

166 **Ken J Ishii, Ihsan Gursel, Mayda Gursel & Dennis M Klinman**

Immunotherapeutic utility of stimulatory and suppressive oligodeoxynucleotides

175 **Stephen M Ansell**

Antibody therapy for non-Hodgkin's lymphoma

182 **Joseph U Igietseme, Francis O Eko, Qing He, Claudiu Bandea & Carolyn M Black**

Developing effective delivery systems for *Chlamydia* vaccines

195 **Jennifer L Davis, Brian C Gilger & Michael R Robinson**

Novel approaches to ocular drug delivery

206 **Milan Reiniš**

Technology evaluation: HPV vaccine (quadrivalent), Aventis Pasteur MSD/CSL

212 **Flor M Munoz**

Technology evaluation: FluNsure, ID Biomedical

221 **Gunther Hartmann**

Technology evaluation: BAY-50-4798, Bayer
