## Genomics, proteomics and pharmacogenetics - Experimental approaches

Edited by Lex Cowsert, Jennifer E Van Eyk & Lukas A Huber

---

237 **Jennifer E Van Eyk, Lukas A Huber & Lex M Cowsert**  
Editorial overview: Genomics, proteomics and  
pharmacogenetics - Experimental approaches

239 **Kai Stühler & Helmut E Meyer**  
MALDI: More than peptide mass fingerprints

249 **Marc K Hellerstein & Elizabeth Murphy**  
Stable isotope/mass spectrometric measurements of  
molecular fluxes *in vivo*: Emerging applications in drug  
development

265 **John C Lindon, Elaine Holmes & Jeremy K Nicholson**  
Metabonomics: Systems biology in pharmaceutical research  
and development

273 **Bret Taback & David SB Hoon**  
Circulating nucleic acids in plasma and serum: Past, present  
and future

279 **Kristian Berg, Pål Kristian Selbo, Lina Prasmickaite &  
Anders Høgset**  
Photochemical drug and gene delivery

288 **Ena Wang, Monica C Panelli, Vladia Monsurró &  
Francesco M Marincola**  
Gene expression profiling of anticancer immune responses

296 **Narendra Wajapeyee & Kumaravel Somasundaram**  
Pharmacogenomics in breast cancer: Current trends and  
future directions

302 **Oliver Ast & Wolfgang Lüke**  
Pharmacogenomics of HIV

308 **Christopher S Baliga & Richard E Sutton**  
The role of phenotyping and replication capacity in anti-HIV  
therapeutics

318 **Francis J Dumont**  
Technology evaluation: Abatacept, Bristol-Myers Squibb

331 **Gang Liu**  
Technology evaluation: ISIS-113715, Isis

337 **James Spicer**  
Technology evaluation: Pertuzumab, Roche/Genentech/Chugai

344 **Jeanette A Andersen**  
Technology evaluation: rh lactoferrin, Agennix
