## Gene transfer and cell-based therapies

Edited by Terry Hermiston, Walter Günzburg & Leonard W Seymour

---

358 **Walter H Günzburg**

Editorial overview: A milestone year for gene therapy goes unnoticed

360 **Toni Cathomen**

AAV vectors for gene correction

367 **Renu Wadhwa, Sunil C Kaul, Makoto Miyagishi & Kazunari Taira**

Vectors for RNA interference

373 **Daniel Boden, Oliver Pusch & Bharat Ramratnam**

HIV-1-specific RNA interference

381 **Federica del Monte, Eddy Kizana, Adel Tabchy & Roger J Hajjar**

Targeted gene transfer in heart failure: Implications for novel gene identification

395 **Andrew Woods, Philip Hobson & Linda S Klavinskis**

Recent developments in molecular therapeutic approaches for rheumatoid arthritis

403 **Martine LM Lamfers & Akseli Hemminki**

Multicellular tumor spheroids in gene therapy and oncolytic virus therapy

412 **Oliver Hauser, Eva Prieschl-Grassauer & Brian Salmons**

Encapsulated, genetically modified cells producing *in vivo* therapeutics

421 **Stephanie R McKeown, Claire Ward & Tracy Robson**

Gene-directed enzyme prodrug therapy: A current assessment

436 **Milan Reiniš**

Technology evaluation: TroVax, Oxford BioMedica

443 **Taff Jones**

Technology evaluation: ChimeriVax-DEN, Acambis/Aventis

451 **Johan R Westphal**

Technology evaluation: ABT-510, Abbott
