

Global regulatory intelligence at your fingertips

IDRAC® AdComm Bulletin

The latest FDA Advisory Committee Meeting information emailed direct to your desk

What it gives you >>

- Selected FDA, CDER, CBER and Office of the Commission meetings
- Comprehensive, impartial summary
- Essential background information to each decision
- The latest FDA advisory committee decisions
- Targeted, easy-to-read information
- Automatic email delivery

Who can benefit >>

- Regulatory professionals
- Clinical trials managers
- Business executives
- Finance investors
- Legal departments

Learn instantly about critical developments and voting decisions

The *AdComm Bulletin* offers a balanced view of all issues discussed at selected FDA, CDER, CBER and Office of the Commission meetings. It enables you to be always on top of FDA decisions regarding new product launches, product approvals and withdrawals, clinical trials, advances in new drug classes — and much more.

The *AdComm Bulletin* is emailed to you soon after each selected US FDA Advisory Committee Meeting ends. There is simply no faster or easier way to learn about critical developments and voting decisions at the FDA's Advisory Committee Meetings.

For current *IDRAC* online regulatory database subscribers, the *AdComm Bulletin* integrates links to *IDRAC* documents that are relevant to the issues discussed at the meetings and voted on by committee members.

Easy-to-read, valuable intelligence

The *AdComm Bulletin* presents regulatory, clinical, and marketing information in an easy-to-read format organized by subject, so you can focus quickly on only the information you need. It arrives in your email box automatically, so you never have to remember to actively check other information sources in order to uncover the regulatory intelligence that can affect your company.

To get the same information found in the *AdComm Bulletin* from current publications on the market, you would have to search for and read entire articles, often weeks or months after the developments have occurred.

The *AdComm Bulletin*, however, is designed so you can glance over the entire summary and go directly to the information you need — quickly and easily.

The regulatory intelligence you can gain from viewing an impartial summary of Advisory Committee Meeting deliberations, and the background that formulated the committee decisions, will give you an important competitive advantage.

With such targeted information at your fingertips, you save significant time, effort, and expense.

Unsurpassed breadth of coverage

IDRAC from Thomson Scientific brings together everything you need to keep up with the ever-changing regulatory requirements in more than 50 countries, replacing the onerous and time-consuming tasks of acquiring, compiling, indexing, cross-referencing, updating and analyzing this information. Tens of thousands of documents cover all aspects of drug development in each country or region, thematically organized for easy retrieval, with more added every day.

- > Reference texts, normally in the local language (with complementary translations into English for China, Japan, Taiwan, Thailand, South Korea and Vietnam)
- > Unique explanatory documents written in English by our team of experts to explain key processes and trends in each country

Every document includes a title, source, abstract, comprehensive and intuitive keywords in English, and extensive hyperlinks. A powerful search engine enables you to interrogate the entire database in seconds using full text, title, and keyword searches.

Outstanding flexibility and service

You can build the *IDRAC* coverage that suits you by subscribing only to the countries relevant to your organization.

As standard, every *IDRAC* subscription also includes free access to the international module, an extensive library of reference texts and explanatory documents covering international organizations such as ICH, WHO, PIC/S, and many others.

IDRAC is supported by a team of global regulatory affairs professionals and database management and online development experts. Training is provided by qualified instructors who can visit your site at your convenience or host a virtual training session online.

You will also receive comprehensive customer service through easy-to-follow product manuals, dedicated telephone and email helpdesk support and our regular *IDRAC*® Weekly Alert.
